RAISING NEW TESTAMENT PROPHETS
FOR THIS GENERATION

*"But the one who prophesies speaks to people for their strengthening,
encouraging and comfort."*

About the School

The Sons and Daughters of Prophets Prophetic Training School is a two-year online school established by Prophet Abiodun Sule under the authority of Treasures in Clay Ministries. It was founded with one conviction: the church needs prophets who are not merely gifted, but biblically grounded, spiritually discerning, and deeply accountable.

The school is completely free of charge. Tuition will never be charged to any student, in any cohort, at any level. Your calling is the only requirement for enrolment.

OUR MISSION

To raise a generation of New Testament prophets who are rooted in the Word, led by the Spirit, and accountable to the Body of Christ.

OUR VISION

A church in which every believer understands, weighs, and walks in the prophetic gifts freely given by the Holy Spirit — in orderly, loving, and fruit-bearing prophetic community.

Why This School?

Prophetic ministry is one of the most misunderstood and misused gifts in the church today. Too many believers have been hurt by prophetic error, manipulation, and presumption. Too many genuine prophetic gifts have remained undeveloped for lack of training, accountability, and a biblical framework.

This school exists to correct that. We believe you can be trained — not just talented. We believe that prophecy can be both genuinely supernatural and properly tested. We believe that the same Spirit who moves in power also calls His people to humility, accuracy, and love.

Our Four Foundations

01. Scripture-Anchored

Every course is rooted in the Word — not tradition, emotion, or personal preference.

02. Discernment First

Students learn to test every spirit before they minister. Accuracy matters.

03. Character Over Gift

Holiness and integrity are prerequisites to prophetic ministry, never afterthoughts.

04. Activation-Based

Prophetic exercises in every lesson — not just theory. You learn by doing.
